DXC Assure Life

Achieve speed to market and product flexibility while preserving and extending the systems you have now: Our cloud-native administration system integrates your current systems to produce the unified customer, producer and internal experience essential for today's digital market.

Insurers know that success in the insurance marketplace requires a carrier to adapt their products quickly to meet changing consumer demographics and needs. But that's not all it takes: Competitive advantage increasingly stems from providing an outstanding experience for customers, agents and staff. It's unlikely, however, that your current systems can offer the kind of modern and efficient experience that your clients and stakeholders demand — as older systems simply were not designed for today's selling and service environments.

But what if you could bring all those systems together to become seamless for your staff and agents? And if you could bring contemporary products to market quickly? Unlike one-off policy systems that only focus on policies they administer, DXC Assure Life provides a cloud-based platform to unify sales and service for your existing book of business and leverage new innovative technology before your competitors do so. And that same system can provide a gateway to alternative servicing strategies such as outsourcing one function or full end-to-end business

process services (BPS), without your having to juggle multiple IT and outsourcing providers.

Adaptable — for a rapidly evolving digital economy

DXC Assure Life is built for the digital economy. Our integrated solution addresses insurers' biggest challenges by streamlining product development, managing IT costs and staffing constraints, offering out-of-the-box straight-through processing and providing an easy-to-use experience on any device.

DXC Assure Life is built for adaptability. It accommodates the full suite of current life and wealth products, including term, traditional, variable and equity index life and annuity products. It also manages a wide range of product riders and benefits designed to meet virtually any of your customers' financial needs. More importantly, it dramatically simplifies new product design with a configuration tool that helps insurers build new products quickly.

DXC Assure Life incorporates both an embedded interoperability gateway

Key benefits

- Develop products up to 50 percent faster with hyperflexible rules, calculations and features

- Deliver an improved customer and producer experience through a tailored interface

- Achieve lower cost of IT ownership with a scalable, cloud-native architecture that always matches demand

as well as a modern communication component that is capable of unifying diverse systems, channels and devices. Both are purpose built to bridge your existing admin systems, bringing them together for a unified customer/agent experience and avoiding the hassle of multiple, less-friendly policy systems that don't "speak digital" well.

DXC Assure Life encompasses a library of APIs designed around processes and functions universal to the business of insurance, so they are applicable no matter the era when your systems were developed.

The component-based DXC Assure Life system can be implemented as a service in the cloud or through BPS. This offers insurers the flexibility to develop individualized roadmaps.

Built for today and tomorrow

DXC Assure Life was built with both today and tomorrow in mind. Our solution can scale to meet any insurer's current and future needs.

- Modern product templates accelerate the development process, reduce the need for costly coding and give insurers a head start in bringing new products to market.

- An open-API architecture readily integrates with third-party service providers and corporate components such as automated new business systems, general ledgers and data analytics.

- Components and externalized business rules enable quick product set-up and efficient market rollouts.

- The system's fully virtualized architecture gives insurers ongoing access to the latest capabilities — eliminating unplanned capital expenses, upgrade costs and the risk of downtime.

Unmatched industry experience in software and insurance operations

Put DXC's unrivaled industry experience to work for you:

- **Industry presence and scale.** DXC has served the insurance industry for 40-plus years, with more than 1,900 customers, countless active customer communities and millions of policies administered on DXC's life and annuity software.

- **Software development.** DXC's global scale in insurance, breadth of services, intellectual property and insurance expertise are unmatched. DXC has all the necessary capabilities in house: software, implementation services, conversions, BPS, best practices and IT/business transformation skills.

- **Insurance administration.** DXC administers over 13 million insurance policies across the globe, using DXC-developed software. We use our own systems for administration.

- **Digital experience.** DXC is dedicated to and collaborates with the best and brightest insurance companies and has received more than 10 industry awards for market-leading software and digital services.

- **Next-generation digital focus.** DXC's next-generation offerings are based on cloud infrastructure and new digital technology, supported by nearly 20,000 insurance-focused professionals who enable insurers to build a digital future while simultaneously transforming legacy businesses.

- **Size, strength and innovation.** DXC's size and proven financial strength enable us to deliver industry innovation year after year, helping insurers grow digitally and transform their existing IT environment.

DXC Assure Life dramatically simplifies new product design with a configuration tool that helps insurers build new products quickly.
