

Border and Immigration Solutions

PROTECTING OUR BORDERS, SUPPORTING IMMIGRATION CONTROL

Governments face complex challenges associated with balancing economic and political openness against critical security concerns.

Beyond a Shadow of a Doubt SM

Governments today face complex challenges associated with balancing economic and political openness against critical security concerns — growing populations, changing socioeconomic realities marked by increased population migration, rising levels of economic interdependence and a shifting global security environment in which terrorism blends with transnational criminal activities. On the domestic front, immigration and border control services are tasked with accurately and affordably mediating the problems associated with managing high volumes of cross-border traffic while accommodating the free flow of commerce according to dynamic immigration policies and threat levels.

Excellence, Distilled: The BIS Center of Excellence

Located in Washington, DC, CSC's Border and Immigration Solutions (BIS) Center of Excellence is designed to help government organizations achieve their border security and immigration goals by deploying solutions involving:

- Large-scale management of personally identifiable information (e.g., driver's licenses, passports, voter registration ID, national identity cards)
- Credential applicant risk analysis (e.g., visas)
- Border event case management
- Immigration services delivery and enforcement

A Range of Proven Capabilities

The Center's mission is to provide clients with one-stop access to solution planning capabilities for projects involving:

- Assessment of identity claims (e.g., civil identification, immigration processing)
- Evaluation of immigration, criminal and national security risks
- Sharing of intelligence and information
- Deployment of reliable identity credentials (e.g., national identity, passports, trusted traveler programs)
- Issuing of visas and other secure documents
- Management of cases and incidents

Experienced CSC principal consultants provide subject matter expertise, business and political acumen, and consulting and system integration experience, facilitating the creation, delivery and support of well-designed, comprehensive, practical and achievable customer-focused solutions.

Managing Personally Identifiable Information

Working with other CSC divisions and Centers of Excellence, the BIS Center provides integrated solutions for managing personally identifiable information in several areas. These include civil and commercial identity management, business process management, identity-based risk assessment, immigration IT infrastructure modernization and business process transition planning, and secure inter- and intra-agency data sharing.

The BIS Center maintains a demonstration center chartered to prove the viability of alternative logical and physical solution architectures using loosely-coupled commercial off-the-shelf software and hardware products operating on service-oriented architecture.

CSC's BIS Center of Excellence: ONE-STOP RESOURCE FOR BORDER AND IMMIGRATION SOLUTIONS

With specialized staff and a dedicated facility, CSC's Border and Immigration Solutions (BIS) Center of Excellence brings together the full suite of solutions that governments need to protect their national borders and enforce immigration rules:

- Strategic and transformation planning
- Identity assessment and management
- Secure identification and credentialing
- Risk assessment and management
- Case and incident management
- Client processing, entry-exit systems

CSC's global Centers of Excellence enable exploration and testing of state-of-the-art solutions with minimum up-front investment and maximum innovation and results. Each Center is equipped with a laboratory for demonstrating and delivering client solutions and evaluating and testing products, methodologies and concepts.
