

Legal Solutions Suite

AT A GLANCE

Access User Summary Information with Claims Handler/Adjuster Dashboards

Navigate More Easily with .Net Technology

Attach Third-Party Receipts Through the System

Improve Matter Workflow and Searches

Legal Solutions Suite 3.0 — Now Faster, Easier to Use

CSC's Legal Solutions Suite® software, used by more than 6,000 law firms to submit invoices electronically over the Web, is designed to simplify the billing process, track outside counsel performance and promote best practices in managing legal matters. Its three components — Legal e-Bill, Legal Bill Analyzer and Legal Matter Manager — work together to create an end-to-end legal management process for:

- Case planning and strategy
- Legal bill auditing and analysis
- Budgeting and staffing
- Electronic billing
- Document management
- Meaningful management reports
- Law firm profiles and performance evaluation.

In the latest release (Release 3.0), CSC not only incorporated new functions but also made numerous improvements to the look and feel of the software to make it easier and faster to use.

Legal Solutions Suite was tested in CSC's Usability Lab to ensure that it is the most-user friendly product on the market. CSC's specialized lab is designed to measure users' reaction to software applications in a controlled one-on-one testing environment. The testing administrator records the physical movements and verbal observations of software users, evaluates responses and follows up with recommendations for improvements.

Legal Solutions Suite underwent the same rigorous testing that CSC applies to software for leading U.S. insurance companies to improve productivity and system navigation. Feedback from users suggested usability improvements to the software.

Used by leading insurance companies to manage claims-related litigation, Legal Solutions Suite also helps corporate legal departments manage a wide variety of legal matters. And a growing number of self-insured organizations and risk pools are turning to Legal Solutions Suite, which integrates with CSC's RISKMASTER,

the industry's most comprehensive claims and risk management software. Legal Solutions Suite also integrates with CSC's insurance systems, Exceed® and POINT IN®.

Highlights of the new release include:

Third-Party Expense Entry: Legal Solutions Suite Release 3.0 allows users to attach third-party receipts through the system. Ultimately, this new function will provide managers with "total outcome" reporting capabilities.

Enhanced Workflow: A redesigned workflow in Matter Manager improves the end-user's experience. This new screen layout allows claim handlers, attorneys, and billing personnel to access and utilize key information in a timely and efficient manner.

Integration: Legal Solution Suite Release 3.0 is now fully integrated with CSC's RISKMASTER® software. The back and forth communication between the two products increases productivity while allowing for industry best practices

Adjuster Dashboard: An Adjuster dashboard is included in Release 3.0. The dashboard allows adjusters to easily manage their day-to-day workflow, resulting in less manual administration.

Usability Enhancements: Numerous usability improvements incorporated into Release 3.0 improve the end users' workflow.

Legal Solutions Suite, developed by legal professionals and supported by one of the world's leading information technology firms, gives organizations a secure, collaborative workspace that streamlines interactions with outside counsel. Now, with CSC's latest enhancements, the system is even easier to use.
