

CSC's Global Oracle Practice Service Offerings

CSC is listed in the "leaders" quadrant of the Gartner report, Magic Quadrant for North American Enterprise Resource Planning (ERP) Service Providers, 2007. The report positions leading external service providers (ESPs) of ERP consulting and systems integration services based on their ability to execute and their completeness of vision.

In Brief:

CSC's experience, passion for results, innovative tri-modal staffing approach and understanding of the "Roadmap to Fusion" help you optimize your Oracle, PeopleSoft and Siebel investments — delivering increased value to your organization.

Competencies:

- Supply Chain Management
- Customer Relationship Management and Service
- Finance and Accounting
- Human Capital Management
- Business Intelligence
- Technical Architecture and Integration

Capabilities:

- Business Transformation
- Shared Services Integration
- Enterprise Systems Optimization
- Program Management
- Organizational Change
- Lab-based Upgrades
- Data Architecture
- Fusion Middleware
- Project Environment Hosting
- Production Hosting
- Remote Application Support

Global Finance

Maximizing your Oracle ERP investment takes on new meaning in the global marketplace. CSC's services, methodologies, tools and experience can help you get it right the first time.

It's not only mergers and acquisitions that drive the need for a robust global financial systems solution, but increasingly, companies are required (through regulation) and asked (via analysts' demands) to provide meaningful and timely information about their operations around the world. Your Oracle ERP solution needs to be implemented in the most efficient manner possible to maximize your investment without breaking the bank.

Gone are the days of waiting for a floppy disk with spreadsheet information, then discovering the errors from manual entry, calling all night to get the right people, then hoping your message was received the same way you sent it. We are no longer able to wait weeks or even days to conduct sales forecasting, cash demand analysis, or even consolidations. In today's world, an organization's finance solution must accommodate a 24 by 7 global business and be flexible enough to change quickly.

CSC can help.

A Global Perspective

CSC is a global company, with 87,000 employees operating in 92 countries, and \$14.6 billion in FY06 revenue.

CSC has a global alliance partnership with Oracle — a leading Enterprise Resource Planning (ERP) provider. With our partner, CSC delivers end-to-end global enterprise solutions, including package evaluation and selection, implementation, and upgrades to performance-enhancing extensions like supply chain, human resources, and customer relationship management. Our dedicated Global Oracle Practice leverages highly skilled resources across industries and applications, so that we can quickly deliver smart and innovative enterprise solutions.

CSC's Methodology

Our professionals have experience implementing the various Oracle application functional modules for both public and private organizations. Within the accounting and finance modules, this includes experience with multi-level consolidations, cash management, reporting, and analysis of financial information. CSC's Catalyst™ Methodology is founded on years of experience and is tailored to the specifics of the Oracle Applications.

CSC specifically uses AIM, a subset of Catalyst, for Oracle eBusiness Suite applications and PinnPoint, another subset of Catalyst, for PeopleSoft applications.

CSC Tools

The methodology includes tools that address specific project components. For example, the projects are sized using an estimating matrix that includes tasks, resources, task drivers, complexity and milestones, all of which feed directly into Microsoft Project.

Data conversion can be one of the more frustrating portions of an ERP implementation, especially in those of global proportions. CSC has developed templates, using the latest Oracle technologies, to facilitate data loads throughout the project for design prototyping, testing and ultimate go-live cutover.

Business Process tools are also utilized to facilitate the design of the ERP solution. These tools document business processes and gap analysis from old to new systems. This includes management, legal, statutory, and regulatory reporting requirements from a local and global perspective, and incorporating the requirements of International Accounting Standards (IAS), US GAAP, Canadian GAAP, UK GAAP, FASB, and more.

Organizational change can sometimes be the most challenging component of global finance projects. CSC is well suited to assist our clients in this area with robust market-leading tools and capabilities to address ERP knowledge transfer, high performance team development, leadership coaching and alignment, and more.

CSC Experience

CSC has consistently applied its rich experience from 48 years of systems integration and management consulting to help clients leverage Oracle applications. As a Global Oracle partner, CSC has served hundreds of companies in a wide range of industries, including high technology, manufacturing, telecommunications, consumer products, healthcare, financial services, and aerospace and defense. Also, CSC is an Oracle Certified Advantage Partner (CAP) in North America, Europe, and Asia.
