

RISKMASTER X

Achieve Unparalleled Accessibility, Usability, Maintainability and Capability

AT A GLANCE

*Manage Risk and Claims,
Track Events with One System*

*Access Entire System Anytime,
Anywhere with a Web Browser*

*Improve Productivity,
Simplify Training*

Lower IT Maintenance Costs

Access Other Claims Tools

RISKMASTER X, the latest version of CSC's RISKMASTER®, combines the software's proven features with new components and a leading-edge architecture designed to support organizations into the future. RISKMASTER X enhances system accessibility, usability, maintainability and capability, streamlining processes and giving organizations greater control over the management of risk and claims.

RISKMASTER X gives self-insured organizations, healthcare providers, public entities, insurance pools, general business and third-party administrators (TPAs) a single system for managing all risk and claims processes, from initial event tracking to online claims administration to reporting for risk analysis.

With more than 450 organizations actively using RISKMASTER, CSC has integrated more functions onto one platform than any other software package. RISKMASTER X is designed to enhance:

- **Accessibility.** RISKMASTER X's Web portal concept, simplified navigation and single sign-on capability allow users to quickly access all features of the system through a Web browser.
- **Usability.** RISKMASTER X's screens are easily configured to the needs of individual users or groups of users. The system's integrated workflow and case management capabilities improve productivity and lower training costs.
- **Maintainability.** RISKMASTER X is deployed on a Web server instead of each user's desktop, giving your IT staff a single point of maintenance.
- **Capability.** RISKMASTER X's service-oriented architecture allows organizations to easily add new features and create efficient claims and risk management processes. Organizations can add a full range of integrated components for advanced business intelligence, legal cost management, claims evaluation, fraud detection and policy management. The RISKMASTER X portal easily integrates with other Web-based systems and third parties.

End-to-End Management of Events and Claims

RISKMASTER is the only system that gives organizations the flexibility to record all events, whether or not they turn into claims. RISKMASTER stores crucial information about each incident that can be added to any subsequent claim records.

RISKMASTER X enables organizations to consolidate disparate databases of events and claims data and gives risk managers a more detailed analysis of trends and loss patterns throughout the organization.

New Features and Functions

RISKMASTER X includes enhanced functions for Utilities, Check Printing, Mail Merge and System Navigation. Additional enhancements include:

- **Navigation Tree** – improving navigation throughout the system
- **Single Sign On** – allowing users to log on once to access multiple applications
- **Power Views** – enabling easily configured screens that optimize workflows based on user needs and security level
- **In-Line Supplemental Fields** – enabling better tracking of multiple variables
- **Tab or Top-Down View** – giving users a choice of methods for navigating the system
- **Field Level Help** – providing users with immediate assistance throughout the system
- **Memo Text Editor** – allowing full text formatting including bold, italics, colors and other attributes to emphasize text on comments in all notes areas of system
- **Enhanced Comments** – combining features of the Adjuster Dated Text and Event/Claim Comments into a single screen, users can enter or view notes from anywhere within an event or claim record with the attachment selection option. All related notes viewable in a single split-view window, and users can search for a specific note or group of notes by:
 - Date
 - User
 - Note type
 - Text included
 - Attached record
- **Organizational Hierarchy Cloning** – allowing users to easily copy a level of the organizational hierarchy to the immediate level below or to subsequent levels. This capability saves time by eliminating the need to manually retype information for each level of hierarchy.

Access Additional Claims Components for Greater Productivity

RISKMASTER X gives organizations the flexibility to tailor software components to their claims processes. It integrates with CSC's complete set of claims tools for tracking outside legal performance, bodily injury evaluation, fraud detection and OFAC compliance, as well as policy administration.

RISKMASTER X offers a comprehensive set of features designed to process, manage and analyze critical claims data:

- General Liability
- Property and Casualty
- Workers' Compensation
- Incident/Occurrence Administration
- First Reports of Injury (FROI)
- OSHA Compliance
- Actuarial Reporting
- Integrated Disability Management
- Productivity Management
- Adjuster/Case Management
- Funds Management
- EDI

Support of an Industry-Leading Software Community

CSC's RISKMASTER has supported many of the world's leading self-insured organizations through every major wave of technology change over the past two decades.

RISKMASTER was the industry's first PC-based claims application, the first Windows-based application, the first 32-bit application and the first Web browser application.

RISKMASTER X provides the framework for the continued enhancement of the system. Through RISKMASTER Users' Group, Advisory Council and Claims Executive Forum, CSC brings together more than 450 organizations representing 10,000 users who share similar goals and challenges.

Find out how your organization can join this growing community and take advantage of the industry's most advanced software for risk and claims management.
