

**DXC Cloud Suite  
for Oracle®**

# Automate and accelerate your migration to Oracle® SaaS

## Benefits:

- Accelerate consolidation, validation and migration
- Tap into our proprietary IP and methodology
- Fast-track the path to Cloud-boosted performance
- Minimise migration costs, as well as timeframes
- Tailor your migration and then scale to suit
- Maximise trouble-free adoption organisation-wide

For a long time, the case for switching from relatively costly high-maintenance on-premise SaaS systems to the Cloud has been clear. The functional, financial and business benefits of consolidating and switching are compelling. But the Cloud-migration path hasn't been quite as obvious. In fact, for many organisations the prospect of a slow, messy migration is the last remaining barrier to leveraging 360° SaaS visibility and real-time insights.

At DXC Technology, we've developed Cloud Suite, which streamlines the migration to Oracle SaaS, focusing on maximising ROI and business value.

## You can expect

- Realistic timeframes based on your individual organisation needs
- To identify and reduce risks around change, integrations, data migration and more, based on nearly two decades of specialised experience
- An honest and independent 'fit assessment' of Oracle SaaS for your organisation
- Us to make Oracle SaaS work for your organisation

Drawing on experience and migration IP, Cloud Suite combines our specially developed utilities, automated tools and proprietary migration methodology to take the risk and pain out of consolidating and migrating your Oracle and non-Oracle SaaS systems and processes in the Cloud.

Now, the path to optimising productivity and strategic decision-making across your organisation is clear and sensible.

## Harness the power of Oracle SaaS faster with Cloud Suite

Just as Cloud Suite simplifies and streamlines the consolidation, validation and migration process, creating a single source of truth for everyone across your organisation, Oracle SaaS makes accessing business-critical data and insights easier and safer.

With intuitive interfaces across the desktop, mobile and social mix, all safeguarded by the enterprise-grade security, making the switch to the Cloud with Cloud Suite will enable your organisation to unlock the ever-evolving potential of Oracle SaaS sooner.

## The benefits of the Cloud

---

### **Consolidate.**

Create an accessible single source of truth across your organisation.

---

### **Supercharge.**

Improve collaboration and decision-making with real-time data.

---

### **Save money.**

Consumption-based subscription pricing, with no infrastructure costs.

---

### **Refocus.**

Free up resources for innovation and business growth and development.

---

### **Scale to suit.**

Dial your Cloud solution up or down to suit your business.

---

### **Expand.**

Easily integrate cost-effective SaaS tools and Cloud technologies.

---

### **Relax.**

Harness the latest functionality with regular updates and no more costly upgrades.

---

## Tailored Cloud Suite: Migrate, uplift, outperform

We've designed Cloud Suite to give you migration control and choices, from a straight 'As is' Oracle Cloud migration and configuration, through to a progressive approach, adopting industry leading standards processes and addressing issues with current state Chart of Accounts and other key entity structures as part of the migration process.

### Migrate.

Migrate entities and structures as they are.

### Uplift.

Uplift data and processes.

### Outperform.

Streamline, standardise and optimise your business operations.

### Automated consolidation and migration from any system

Automatic data validation

Automatic issue tracking and reporting

Automatic data remediation

Automatic data loading

This focus on automation extends to the analysis and management of customisations, if required, from analysis in the source system, to impact analysis and Cloud SaaS upload configuration.

- Australia and New Zealand's largest Oracle partner practice
- 20+ years' delivering Oracle solutions
- Hundreds of successful cloud implementations
- Small start-ups to tier-one enterprises
- Proven methodology and governance
- Market-leading cloud insights and IP

## About DXC

DXC has the largest independent provider of Oracle consulting and managed services in Australia and New Zealand. DXC provides dynamic technology leadership in delivering Oracle Cloud solutions, with a full continuum of services around Oracle's integrated suite of applications, platform services, and engineered systems.

DXC offers speed and agility with thought leadership and global scale. This allows us to design and deliver innovative market-leading solutions that enable clients to transform their businesses and the broader market.

Oracle has globally recognised DXC's expertise and skills by accrediting us as a Modern Oracle PartnerNetwork (OPN) partner certified across all four tracks - Build, Sell, Service, License/Hardware. DXC has achieved Cloud Solutions Provider Expertise (CSPE), globally certified, audited, proven.
